GENERAC GENERATOR BASICS

RPA050 - Basic Electrical Concepts

This course is designed primarily for those with little or no knowledge of electricity. There are no detailed, technical discussions of electrical theory or the laws of physics. Instead, the course begins with an introduction to basic electrical system components through a discussion of how electricity is delivered to, and distributed throughout our homes. Then we provide a conceptual framework for thinking about difficult concepts such as amperage and voltage through simple analogies to familiar objects and concepts.

Approximate Length: 25 minutes

RPA060 - Generator Basics

This course provides an introduction to generators and how they produce electricity. We focus on the major components that are common to conventional AC generators; the engine, the alternator and the controller. In addition, we provide a basic description of a simple automatic transfer switch and its function in transferring power between the utility and an automatic standby generator.

Approximate Length: 15 minutes

GENERAC MOBILE PRODUCTS

Generac Mobile PowerZone Controller

RMC100 - Generac PowerZone Digital Genset Controller

This course provides a comprehensive review of the Power Zone digital controller. Specifically we will discuss the features and benefits of the Power Zone; the different operator screen and the information they contain; how to use the maintenance screens to identify and diagnose alarms; using the Power Zone controller for generator start up; and basic troubleshooting.

Approximate Length: 30 minutes

Generac Mobile Generators

RMG100 - Generac Mobile Generators

This course provides a comprehensive review of the features and benefits of the MDG25IF4 mobile generator. Specifically we will discuss the most common uses for the generator, its features and benefits, how it compares to its top competition, set up, and basic troubleshooting.

Approximate Length: 30 minutes

Generac Mobile Light Towers

RML100 Generac Mobile Light Towers

This course provides a comprehensive review of the features and benefits of the different families of mobile light towers. We will discuss the most common applications for light towers, their features and benefits, how they compare to the top competition, set up, and basic troubleshooting.

Approximate Length: 30 minutes

Generac Mobile Pumps

RMP150 Generac Mobile Pumps: Basics and Theory

New!

This course provides an overview of the features and uses of the pumps available from Generac Mobile Products. Common applications and considerations for the selection of the right pump, proper set up, and basic troubleshooting are presented. This course not only outlines how to select the right model/style of pump but also explains how to properly size a pump for your specific needs.

Approximate Length: 30 minutes

MY ACCOUNT

Thank you for using The Learning Center - Generac online training system. This Quick Start Guide is designed to help you access the system right away. To learn about all of your options and to see how the system works in greater detail, a User's Manual is also available through a link on the home page.

STEP 1: ACCESS THE SYSTEM

- Type learning.generac.com into your Internet browser.
- **We highly recommend using Google Chrome and a hard wired Internet connection when using the online training system.**

STEP 2: REGISTER

- On the home page, select **To create an account, register here.**
- Select **Reseller** from the Learning Group type and click **NEXT**.
- **Enter your "Sold to" Company Account Number and click "Next".**
- Confirm that the information that appears is correct and click **YES**.
(Note: The system may display the location of your company's headquarters instead of your local address).
- Enter the proper information into all fields on the registration form and click **REGISTER**. (Use your local company address here).
- You should now have permission to take courses. Click **CONTINUE**.

STEP 3: TAKE COURSES

- Click on the **CATALOG** icons to see a list of available courses.
- Click the **COURSE** icon for the course you would like to take.
- Click the **ENROLL** icon to enroll in a course.
- Click the **MY ACCOUNT** tab to view the courses you selected.
- To view the lessons within the course, click the green **GO** button.
- Click on the links under the **COURSE MATERIALS** to download and print course materials.
- Click the green **GO** button to start the lesson.
- Always use the system's control buttons to navigate the program. DO NOT use the browser's back or refresh buttons. DO NOT close the main Learning Center screen.
- When you exit lessons, the screen will say "Processing Data... Please Wait." WAIT for the screen to say "Data Saved... Click here to go to your "My Account" screen". Click the link to return to the course lesson list.
