LED
Mobile Light Tower
Generac Mobile Products continues to lead the way in innovative, efficient industrial mobile lighting with the MLT4060MVD LED mobile light tower. Purpose designed for remote and fully autonomous applications, the MLT4060MVD light tower features an advanced multi-speed engine that adjusts the speed to the power load for enhanced fuel efficiency. The ECOSpeed™ engine enables a maximum runtime of up to 533* hours on a single diesel tank fill. Durable LED lights are built for long-lasting performance with minimal power consumption.

*Results based on engine manufacturer and field test data after 100-hour engine break-in period and may vary based on factors including age and maintenance of equipment, environmental conditions and fuel density. Consult the Owner’s Manual for fuel and maintenance recommendations.
**APPLICATIONS**

**USA (METRIC)**

- **Engine / Tier:** Mitsubishi / Final Tier 4
- **Prime:** 10.5 hp @ 1800 RPM
- **Rated Power:** kW 6
- **Output:** amps 50
- **Fuel Capacity:** gal (L) 104 (394)
- **Est. Fuel Consumption @ Full Load:** gph (Lph) 0.549 (2.078)
- **Est. Fuel Consumption / ECOSpeed™:** gph (Lph) 0.195 (0.738)
- **Max Runtime ECOSpeed™ (Lights Only):** hrs 533
- **Mast Height, Deployed:** ft (m) 23 (7.01)
- **Light Fixtures:** (4) 240W LED
- **Total Lumens:** 88,000
- **Dimensions; Tongue Up, Mast Stowed:** in (m) 106 x 68 x 100 (2.69 x 1.73 x 2.54)
- **Operating Weight:** lbs (kg) 2770 (1256)
- **Dry Weight:** lbs (kg) 1694 (768.4)
- **Max Wind Rating:** mph (kph) 65 (105)
- **CSA Approved:** Yes

---

**BENEFITS**

**FUEL CONSERVATION** The ECOSpeed engine runs at low speed and conserves fuel when operating the LED lights. The extra large fuel tank and low speed operation allow up to 533* hours of operation on a single diesel tank fill.

**Power Zone® AUTOLIGHT CONTROLLER** provides user friendly simple automatic start and stop selections, as well as dusk-to-dawn photo sensor operation and 7-day scheduled run periods.

**EXTENDED SERVICE** interval of 750 hours. The engine temperature management combined with the low speed operation greatly reduce normal engine oil consumption. Saves money on labor and maintenance costs.

**GROUND-ADJUSTABLE** light fixtures and vertical mast deploy easily. Pinch-free guards route fixture cords to avoid tangles. Exhaust and engine pulleys and belts are fully guarded. A positive air shutdown option protects against uncontrolled externally ingested fuel sources.

**ENGINE HEALTH** is optimized by an active engine temperature management system that keeps the engine above the 170°F (77°C) the minimum temperature recommended for proper operation and longevity.

**COLD WEATHER** package options allow operation in temperatures down to -40 F/C.

Specifications are subject to change without notice.
