<thead>
<tr>
<th>Unit Model Number</th>
<th></th>
</tr>
</thead>
<tbody>
<tr>
<td>Unit Serial Number</td>
<td></td>
</tr>
<tr>
<td>Date Purchased</td>
<td></td>
</tr>
</tbody>
</table>

Record the information found on your unit data label on this page. Engine and generator serial numbers are located on separate data plates affixed to the engine and generator respectively. When contacting a Generac Mobile Products Authorized Service Dealer (ASD) about parts and service, always supply the complete model number and serial number of the unit.

**Operation and Maintenance:** Proper maintenance and care of the generator ensures a minimum number of problems and keeps operating expenses at a minimum. It is the operator’s responsibility to perform all safety checks, to verify that all maintenance for safe operation is performed promptly, and to have the equipment checked periodically by an ASD. Normal maintenance, service and replacement of parts are the responsibility of the owner/operator and, as such, are not considered defects in materials or workmanship within the terms of the warranty. Individual operating habits and usage may contribute to the need for additional maintenance or service.

Section 1: Introduction and Safety

Introduction

Thank you for purchasing a Generac Mobile Products LLC product. This unit has been designed to provide high performance, efficient operation, and years of use when maintained properly.

The information in this manual is accurate based on products produced at the time of publication. The manufacturer reserves the right to make technical updates, corrections, and product revisions at any time without notice.

Read This Manual Thoroughly

If any section of this manual is not understood, contact your nearest Generac Mobile Products Authorized Service Dealer (ASD), or contact Generac Mobile Products Technical Service at 1-800-926-9768 or www.generacmobileproducts.com with any questions or concerns.

The owner is responsible for proper maintenance and safe use of the equipment. Comply with regulations the Occupational Safety and Health Administration (OSHA) has established, or with equivalent standards. Also, verify that the unit is applied, used, and maintained in accordance with the manufacturer's instructions and recommendations. Do nothing that might alter safe application/usage and render the equipment unsafe.

Safety Symbols and Meanings

Throughout this publication, and on tags and decals affixed to the unit, DANGER, WARNING, CAUTION and NOTE blocks are used to alert personnel to special instructions about a particular operation that may be hazardous if performed incorrectly or carelessly. Observe them carefully. Their definitions are as follows:

![DANGER](image)
Indicates a hazardous situation which, if not avoided, will result in death or serious injury.

![WARNING](image)
Indicates a hazardous situation which, if not avoided, could result in death or serious injury.

![CAUTION](image)
Indicates a hazardous situation which, if not avoided, could result in minor or moderate injury.

![NOTE](image)
Notes contain additional information important to a procedure and will be found within the regular text of this manual.

How to Obtain Service

When the unit requires servicing or repairs, contact an ASD for assistance. Service technicians are factory-trained and are capable of handling all service needs. For assistance locating a dealer, go to https://www.generacmobileproducts.com/parts-service/find-service.

When contacting an ASD about parts and service, always supply the complete model and serial number of the unit as given on the data decal located on the unit. Record the model and serial numbers in the spaces provided on the front cover of this manual.
Introduction and Safety

General Hazards

**WARNING**

Hearing Loss. Hearing protection is recommended when using this machine. Failure to wear hearing protection could result in permanent hearing loss.  

**WARNING**

Vision loss. Eye protection is required when operating unit. Failure to wear appropriate eye protection could result in vision loss or serious injury.  

**WARNING**

Moving Parts. Keep clothing, hair, and appendages away from moving parts. Failure to do so could result in death or serious injury.  

**WARNING**

Equipment damage. Do not attempt to start or operate a unit in need of repair or scheduled maintenance. Doing so could result in serious injury, death, or equipment failure or damage.  

**WARNING**

Risk of injury. Do not operate or service this machine if not fully alert. Fatigue can impair the ability to service this equipment and could result in death or serious injury.  

**WARNING**

Equipment damage. Only qualified service personnel may install, operate, and maintain this equipment. Failure to follow proper installation requirements could result in death, serious injury, and equipment or property damage.  

**CAUTION**

Equipment or property damage. Do not block air intake or restrict proper air flow. Doing so could result in unsafe operation or damage to unit.

Electrical Hazards

**DANGER**

Electrocution. In the event of electrical accident, immediately shut power OFF. Use non-conductive implements to free victim from live conductor. Apply first aid and get medical help. Failure to do so will result in death or serious injury.  

**DANGER**

Electrocution. Water contact with a power source, if not avoided, will result in death or serious injury.  

**DANGER**

Electrocution. Verify electrical system is properly grounded before applying power. Failure to do so will result in death or serious injury.  

**DANGER**

Electrocution. Do not wear jewelry while working on this equipment. Doing so will result in death or serious injury.  

**DANGER**

Electrocution. DO NOT use the unit if electrical cord is cut or worn through. Doing so will result in death or serious injury.
Operating Safety

Positioning the Unit

**WARNING**

Crushing hazard. Verify unit is properly secured and on level ground. An unsecured unit can suddenly roll or move, causing death or serious injury.

(000234a)

**WARNING**

Personal injury. Only use water from controlled, reliable sources. Uncontrolled water could contain bacteria. Inhaling mist containing bacteria could result in death, or serious injury.

(000584)

**WARNING**

Personal injury. Keep people and pets away from work area. Failure to do so could result in death or serious injury.

(000420)

**WARNING**

Personal injury. Never direct air jet toward people or animals. Shut unit OFF immediately if people or animals enter the work area. Failure to do so could result in death or serious injury.

(000585)

- The area immediately surrounding the unit should be dry, clean, and free of debris.
- If the unit is equipped with a frame grounding stud, follow any local, state, and National Electrical Code (NEC) guidelines when connecting.

Starting the Unit

**DANGER**

Electrocution. DO NOT use the unit if electrical cord is cut or worn through. Doing so will result in death or serious injury.

(000263a)

**WARNING**

Equipment damage. Do not attempt to start or operate a unit in need of repair or scheduled maintenance. Doing so could result in serious injury, death, or equipment failure or damage.

(000291)

Service Safety

**WARNING**

Before servicing unit, shut unit down, turn water supply OFF, and disconnect unit from power source. Failure to do so could result in death, serious injury, or equipment damage.

(000586)

Lifting Hazards

**WARNING**

Personal injury. Failure to properly connect lifting cables, chains, or straps could result in death, serious injury, or property damage.

(000346)

**WARNING**

Personal injury. Do not use lifting eye if there are signs of damage or corrosion. Doing so could result in death, serious injury, or property damage.

(000433)

**WARNING**

Personal injury. Do not use lifting eye other than as directed. Doing so could result in death, serious injury, or property damage.

(000434)

**WARNING**

Personal Injury. Verify all fasteners are properly tightened prior to lifting unit. Failure to do so could result in death, serious injury, or property damage.

General Information

Setup

Water System Connection

**WARNING**

Personal injury. Only use water from controlled, reliable sources. Uncontrolled water could contain bacteria. Inhaling mist containing bacteria could result in death, or serious injury.

1. See *Figure 2-2*. Verify water valve (A) is closed.

![Figure 2-2. Connecting Water Supply](image)

2. Connect water supply to water fitting (B).

**Electrical Connection**

**DANGER**

Electrocution. In the event of electrical accident, immediately shut power OFF. Use non-conductive implements to free victim from live conductor. Apply first aid and get medical help. Failure to do so will result in death or serious injury.

1. See *Figure 2-3*. Verify switch (A) is in OFF position.

![Figure 2-3. Electrical Connection](image)

2. Connect to socket (B) 240v power with the following requirements:
   - Extension cord must be marked “WA” or indicate it is suitable for outdoor use.
   - Power source must be equipped with residual-current device (RCD) protection.
   - Use adequately sized extension cords of appropriate length. See *Table 1* for recommended cable size and length.

**Table 1 - Recommended Shore Power Cable Size and Length**

<table>
<thead>
<tr>
<th>Suggested Power Cables and Lengths</th>
</tr>
</thead>
<tbody>
<tr>
<td>50 ft. (15.2 m) 10/3—(L5-20P – L5-20R)</td>
</tr>
<tr>
<td>100 ft. (30.5 m) 12/3—(5-15P – 5-15R)</td>
</tr>
</tbody>
</table>

**DANGER**

Electrocution. Verify electrical system is properly grounded before applying power. Failure to do so will result in death or serious injury.

**DANGER**

Electrocution. Water contact with a power source, if not avoided, will result in death or serious injury.
Section 3: Operation

Operation and Use Questions

Contact your nearest Generac Mobile Products Authorized Service Dealer (ASD), or contact Generac Mobile Products Technical Service at 1-800-926-9768 or www.generacmobileproducts.com with any questions or concerns about unit operation and maintenance.

Before Starting

1. Place unit on flat ground in a well ventilated area.
2. Place barriers 6 ft (2 m) around unit to prevent unauthorized personnel from nearing unit.
3. Verify sufficient water supply is properly connected. See Water System Connection.
4. Inspect all electrical cords; repair or replace any cords that are cut, worn, or bare.
5. Verify power cord is properly connected to a 240 volt 60 hz power source. See Electrical Connection.

NOTE: For grounding requirements, follow the National Electrical Code (NEC), state, and local regulations.

Starting the Unit

1. See Figure 3-1. Press start button (A) to start fan.
2. See Figure 3-2. Open valve (B).

Figure 3-1. Starting the Unit

Figure 3-2. Starting the Unit
Operation

Stopping the Unit

1. See Figure 3-1. Close water valve (A).
2. Wait for water to stop spraying from nozzles (B).
3. See Figure 3-4. Press stop button (C).

Adjusting Jet Angle

1. See Figure 3-5. Pull tilting blower knob (A).
2. Use handle (B) to tilt blower to desired angle.
3. Release tilting blower knob to lock position.

Lifting the Unit

⚠️ **WARNING**
Personal injury. Failure to properly connect lifting cables, chains, or straps could result in death, serious injury, or property damage.

1. Verify the equipment being used to lift the unit is in good condition and has sufficient capacity. For approximate weights, see Specifications.
2. See Figure 3-6. Always remain aware of people and objects around the work site when moving or lifting the unit.
   - When lifting the unit, attach any slings, chains, or hooks directly to the central lift point (A).
   - Use forklift pockets (B) with care. Avoid approaching the unit at an angle, as this can permanently damage the forklift pockets, tires, or cabinet. Verify any obstructions are clear of the forklift tines before lifting.

⚠️ **WARNING**
Personal Injury. Do not use lifting eye if there are signs of damage or corrosion. Doing so could result in death, serious injury, or property damage.

⚠️ **WARNING**
Personal Injury. Do not use lifting eye other than as directed. Doing so could result in death, serious injury, or property damage.
Section 4: Maintenance and Troubleshooting

WARNING

Before servicing unit, shut unit down, turn water supply OFF, and disconnect unit from power source. Failure to do so could result in death, serious injury, or equipment damage.

Daily Walk-Around Inspection

Perform a walk-around inspection of the unit every day before starting the unit. Look for conditions that could hinder performance or safety, such as (but not limited to) damaged or missing parts and hardware, and loose or broken electrical connections.

CAUTION

Equipment Damage. Failure to perform a daily inspection could result in damage to the unit.

General Maintenance

<table>
<thead>
<tr>
<th>Maintenance Activity</th>
<th>After First Operation</th>
<th>Before Each Use</th>
<th>Semi-Annually</th>
</tr>
</thead>
<tbody>
<tr>
<td>Check all electrical connections</td>
<td></td>
<td></td>
<td></td>
</tr>
<tr>
<td>Clean Inlet Filter</td>
<td></td>
<td>❖</td>
<td></td>
</tr>
<tr>
<td>Clean Nozzles</td>
<td></td>
<td>❖</td>
<td></td>
</tr>
</tbody>
</table>

Poorly maintained equipment can become a safety hazard. In order for the equipment to operate safely and properly over a long period of time, periodic maintenance and occasional repairs are necessary. DO NOT perform routine service unless all electrical components are OFF. Regular maintenance will improve performance and extend engine/equipment life. Generac Mobile Products LLC recommends all maintenance work be performed by a Generac Mobile Products Authorized Dealer (ASD).

Inspecting the Unit

- If the unit is stored outside, check for water inside the cabinet and control panel cover before each use. If wet, dry the unit thoroughly before starting.
- Inspect condition of electrical cords. DO NOT use the unit if insulation is cut or worn through.
- Verify the wheels and locking caster are present and in serviceable condition.

Preparing for Service

Before servicing the unit, always follow the instructions listed below.

1. Verify unit power switch is OFF.
2. Disconnect shore power from the unit.
3. Disconnect water supply from the unit.
4. Attach a DO NOT USE sign to the control panel. This will notify everyone that the unit is being serviced and will reduce the chance of someone inadvertently trying to start the unit.

Cleaning the Unit

See Figure 4-1. After each use, clean nozzles (A) with a water solution and antilimestone product.

![Figure 4-1. Cleaning the Unit](A)

Always clean the unit after each use to remove dust, grease, mud, or spilled fuel or oil. Use soft, clean rags to wipe the cabinet exterior and control panel. Low-pressure compressed air (less than 40 PSI [276 kPa]) can also be used to remove dust and debris from the cabinet interior. This unit contains sensitive electronic components that can be damaged by high pressure, heat and moisture. Do not wash the unit with a high pressure hose or power washer. Water may enter the cabinet and collect in the control panel or other electrical parts, causing damage.
Inlet Filter Cleaning
1. *Figure 4-2*. Remove inlet filter plug (A).
2. Remove filter cartridge.
3. Tap cartridge on a solid surface and blow with compressed air to remove sediment.
4. Install cartridge and replace inlet filter plug.

Nozzle Cleaning
1. Remove nozzles from blower cone with a wrench.
2. Soak nozzles in an antilimestone solution overnight.
3. Rinse nozzles.
4. Reinstall nozzles.

General Troubleshooting
This information is intended to be a check or verification for simple causes that can be located and fixed. It does not cover all types of problems. See the engine operator’s manual for additional troubleshooting information. Procedures that require in-depth knowledge or skills should be performed by an ASD.

<table>
<thead>
<tr>
<th>Problem</th>
<th>Possible Cause</th>
<th>Solution</th>
